CHEMICAL-PHYSICAL CHARACTERISTICS:

| | | | |
|---------------------------|--|------------------|--|
| Chemical classification | - Non-ionic emulsion, cationic, perfumed essences | Odour | - Characteristic |
| Physical state and colour | - Clear red liquid | Specific gravity | - 1.0 g/l ca |
| Water solubility | - Emulsifiable | Biodegradability | > 90% (according to EU regulation n° 648/2004 of 31/03/2004) |
| pH | - <13 | | |
| Phosphorus content | - Absent (in any case not relevant for product typology according to EU regulation n°648/2004 of 31/03/2004) | | |

USE:

SANI-CLEAN is a detergent specially made for use with the Powertec and Eveline machines, to be used principally for cleaning toilets, washbasins and tiled environments. It degreases and sanitises without attacking the surfaces treated, and leaves a pleasant perfume in the air.

METHOD OF USE AND DOSAGE:

Neat product is drawn up by and automatically mixed in the cleaning apparatus to apply evenly on the parts to be cleaned. Leave the time necessary to work and then rinse with water.

PRECAUTIONS:

Avoid contact with the eyes. Follow the advice given in the relevant safety sheet.
